

THE EASTERN SPECIALTY COMPANY

OPERATING INSTRUCTIONS

CAT. 223 CABLE SEALS

TESCO Cable Seals (Catalog No. 223) are used primarily for securing CT and PT cabinets, in addition to metering enclosures. TESCO Cable Seals are flexible, tamper-proof, user-friendly, and customizable. Our Cable Seals are available with a range of cable diameters from 1/16" to 1/5" and customized lengths to suit any application.

INSTRUCTIONS:

 <p>1</p>	<p>Insert the detached end of the cable in the opening of the designated location.</p>
 <p>2</p>	<p>Pass the detached end of the cable through the meter seal body to lock the seal.</p> <p>WARNING </p> <p>The cable cannot be removed by pulling it backward once inserted in the meter seal body.</p>
 <p>3</p>	<p>For very secure sealing, the hanging loop should be as small as possible.</p>

CAUTION

With its tamper-evident design, once locked, the meter cannot be unlocked without destroying the seal.
