LIMITED WARRANTY & LIMITATION OF LIABILITY

TESCO warrants to the original purchaser that it will correct all defects in material and/or workmanship in the Instrument, test equipment or software covered by this warranty (herein called "**PRODUCT**"), provided that TESCO is notified of such defect within the warranty period (set forth below) in accordance with paragraph four of this Warranty.

WARRANTY PERIOD. The warranty period shall begin on the date of shipment of the PRODUCT or the date of the issuance of this warranty certificate, whichever is later. If no warranty period is specified below and signed by an authorized DISTRIBUTOR of TESCO, the Warranty Period shall be one (1) year. In no event shall this Warranty remain in effect for more than the stated Warranty Period plus two (2) months after the date of shipment. TESCO's sole obligation and the purchaser's sole remedy under this Warranty is limited to repair or replacement, at TESCO's option, free of charge, F.O.B. TESCO's factory at Bristol, PA of any workmanship and/or part which in TESCO's sole judgment displays evidence of defect. On-site Warranty repairs will be made when in TESCO's judgment the PRODUCT cannot practically be shipped to TESCO's factory. Any modifications, additions or upgrades made to the PRODUCT or control software after this warranty becomes effective shall not extend the term of this warranty.

COVERAGE. The warranty set forth above shall be applicable only if the PRODUCT:

- 1. Is used for the specific purpose for which it was intended;
- 2. Is operated in accordance with instructions, if any, supplied by TESCO;
- 3. Has not been modified, neglected, altered, tampered with, vandalized, abused or misused, or subjected to accident, fire, flood or other casualties;
- 4. Has not been repaired by unauthorized persons;
- 5. Has not had its serial number altered, defaced or removed;
- 6. Has not been connected, installed or adjusted other than in accordance with the instructions, if any, furnished by TESCO.

The warranty set forth herein DOES NOT APPLY to defects resulting from ordinary wear, tear and usage, or any cause, similar or dissimilar, not resulting solely from defective material and/or workmanship.

The Warranty set forth herein shall NOT be effective unless:

- 1. Notice of defect is given to TESCO by phone, fax, email or mail as soon as the defect is discovered.
- 2. Notice of defect contains the following information: PRODUCT serial number, PRODUCT model number, date of original installation, and an accurate and complete description of the defect including the exact circumstances leading to the defect.
- 3. The defective PRODUCT or part is returned only upon authorization from TESCO as evidenced by the issuing of a Return Merchandise Authorization (RMA) number, and that the transportation charges are prepaid (except that TESCO may, at its option, appoint a qualified DISTRIBUTOR to make field inspections of the PRODUCT for which purpose the purchaser shall permit such DISTRIBUTOR to enter upon its premises and examine the PRODUCT).
- 4. The Return Merchandise Authorization (RMA) number is written on the shipping label and all paperwork defective PRODUCT or part.
- 5. The defective PRODUCT or part is returned in the original packing or packing approved by TESCO

TESCO is not responsible for drayage charges, damages or labor costs incurred in conjunction with failure, removal or reinstallation of any PRODUCT, all of which shall be at the purchaser's expense. TESCO is not responsible for special, incidental or consequential damages, whether resulting from breach of warranty, negligence or any other reason.

TESCO manufactured parts will be available for a minimum period of at least two years after the manufacture of a PRODUCT has been discontinued.

TESCO will provide original purchaser during the Warranty Period, unlimited telephone consulting time for the purpose of PRODUCT trouble shooting/servicing and for the first thirty (30) days of the Warranty Period, unlimited telephone consulting time for the purpose of PRODUCT/software application.

THE WARRANTY CONTAINED HEREIN IS IN LIEU OF ALL OTHER WARRANTIES AND TESCO MAKES NO OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OR CONDITION, DESIGN, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR ANY OTHER MATTER.

No other Warranty, express or implied, is authorized by TESCO, and no DISTRIBUTOR of TESCO or any other person has any authority to amend, extend, modify, enlarge or otherwise alter the foregoing warranty and disclaimers in any way whatsoever, except as provided for in an Extended Limited PRODUCT Warranty Agreement.

1.1 Introduction

KATC-C2 FOR CT QUALIFICATION

The Knopp Type KATC-C2 Precision Transformer Comparator is a next generation of the popular Type KATC-C Comparator. It incorporates NextGen[™] metrology technology, processors and software environment for testing and qualifying CT's.

Knopp's KATC-C2 is a highly accurate state-of-the-art current comparator that is compatible with all older generation Knopp comparators, and is designed to be a direct, plug-in replacement requiring no modification of the existing Knopp Current Transformer Test Systems.

The KATC-C2 will be referred to as the "Instrument" throughout the operational manual.

1.2 Contacting TESCO

To contact TESCO, call one of the following telephone numbers:

- Technical Support: 215.785.2338
- Calibration/Repair: 215.785.2338

Visit our website at <u>www.tescometering.com</u> or send an email to <u>support@tescometering.com</u>.

To view, print, or download the latest manual supplement, visit <u>www.tescometering.com</u>.

1.3 General Safety Summary

This manual contains information and warnings that must be observed to ensure safe operation and to keep the Instrument in a safe condition. Operation or service in conditions or in a manner other than specified could compromise safety. For the correct and safe use of this device, it is essential that both operating and service personnel follow accepted safety procedures in addition to the safety precautions specified.

In this manual, a **WARNING** identifies conditions and actions that pose hazard(s) to the user, while a **CAUTION** identifies conditions and actions that may damage the Instrument or the test equipment.

To avoid electrical shock, personal injury, or fire hazard:

- The device must NOT be switched on if it is damaged or suspected to be faulty.
- Do not operate the device in wet, condensing, or dusty conditions, or if exposed to explosive gas.

- If the equipment is used in a manner not specified in this manual, the protection provided by the Instrument may be impaired.
- Whenever it is likely that safety protection has been impaired, the device must be made inoperative and be secured against any unintended operation. Inform gualified maintenance or repair personnel.
- Safety protection is likely to be impaired if, for example, the Instrument displays • visible damage or fails to operate normally.

1.4 Description of Safety-related Icons

ICONS	DESCRIPTION		
Risk of danger. Important information. See manual.			
\$	Hazardous voltage. Risk of electrical shock.		

1.5 Protective Earth / Grounding

To avoid electrical shock or personal injury, do not intentionally or unintentionally interrupt the protective ground conductor inside or outside the Instrument. Interrupting the protective ground conductor is likely to make the Instrument dangerous. Intentional interruption is prohibited.

1.6 Product Features

1.6.1 **Key Features**

- 178ppi Full Color LCD Screen •
- Front Keypad for Data Entry •
- Front USB and Ethernet Connectivity •
- Powerful, multi-core, 32-bit processors •
- 0.001 Accuracy Class Resolution, 0% to 400% of Accuracy Class Measurable •
- **Reduced Testing Time** •

1.6.2 Standard Features

- Auto-Rundown Capable
- Automatic Sensing of 50 or 60 Hertz
- Configurable Units (Degrees, MilliRads, Minutes),(Amps, %Ratio),(RCF, %Error)
- 5A Current, Optional 1A Current
- 3U Compatible Enclosure

1.7 General Specifications

1.7.1 Input Characteristics

PARAMETERS	Value
Power Supply	120 VAC, 2A
Supply Frequency	45-65Hz

1.7.2 Dimensions

PARAMETERS	KATC-C2
Height	5.25″
Width	19"
Depth	16"
Weight	Vary by product

1.7.3 Measurements Resolution

Valid for 50Hz/60Hz and Current of 0.05A to 20A.

PARAMETERS	RCF	Phase Angle	Acc. Class
0.0% ≤ Acc. Cl. < 0.2%	0.000 000 1	0.001'	0.000 1
0.2% ≤ Acc. Cl. < 0.7%	0.000 000 1	0.001'	0.000 1
0.7% ≤ Acc. Cl. < 1.4%	0.000 000 1	0.001'	0.000 1
1.4% ≤ Acc. Cl. < 10.0%	0.000 000 1	0.001'	0.000 1
10.0% ≤ Acc. Cl.	0.000 000 1	0.001'	0.000 1

1.7.4 Measurement Accuracy

Valid for all current comparators, provided Calibration Certification will provide further detail. Valid for 50Hz/60Hz and Current of 0.05A to 20A.

PARAMETERS	RCF	Phase Angle	Acc. Class
1% to 4.99% Full Scale	400ppm	2.0'	0.04%
5% to 400% Full Scale	50ppm	0.5′	0.01%

1.8 About this Operations Manual

This manual provides complete information for installing and operating the Instrument. This document instructs the user on the following operations of the KATC-C2:

- Installation
- Front Panel Features
- Graphical User Interface (GUI)
- How to set up the machine for remote operation using PC Application
- Instrument Maintenance

2.0 INSTALLATION

2.1 Introduction	7
2.2 Unpacking and Inspection	7
2.3 Mounting	7
2.4 Main Power Supply	8
2.5 Connection to KCTS	9

2.1 Introduction

This chapter provides instructions for unpacking and installing the Instrument. Read this chapter before you operate the Instrument. Instructions for cable connections can be found here.

2.2 Unpacking and Inspection

The Instrument is shipped in a container designed to prevent damage during shipping.

Inspect the Instrument carefully for damage, and immediately report any damage to the shipper. A packing list is included in the packaging. When you unpack the Instrument, check for all the standard equipment listed and check the shipping order for any additional items ordered. Report any shortage to the place of purchase, to your distributor, or directly to TESCO.

2.3 Mounting

The instrument contains four mounting holes, (1) as shown above, on the front panel and should be mounted to the KCTS where the previous comparator was placed. All four screws can then be mounted as they were prior through the four mounting holes. If not in a KCTS, mount as normal into a 3U enclosure.

7

2.4 Main Power Supply

The Instrument can be powered by plugging it to a 120V-Single Phase AC line. An AC line power cord is provided.

Figure 2.4. KATC-C2 Main Power Supply

NUMBER	DESCRIPTION
1	Power Switch
2	5A Fuse
3	Power Inlet Port
4	Chassis Ground

Table 2.4. KATC-C2 Main Power Supply sections

The Instrument should only be plugged to an AC outlet with a 90 – 120V voltage range to avoid damaging the Instrument.

To avoid electrical shock, personal injury, or fire hazard, connect the factory-supplied threeconductor-line power cord to a properly grounded power outlet.

During test operation, a two-conductor adapter or extension cord MUST NOT be used. This will break the protective ground connection and will affect the measurement accuracy of the Instrument.

The power outlets supplying the Instrument system should be controlled by an emergency switch so that power can be switched off if a hazard arises.

2.5 Connection to KCTS

The Instrument is powered by plugging it into a 120V-Single Phase AC line. An AC line power cord is provided. KCTS has a cable within cabinet for this purpose.

Input #	Input Label	Signal	Value	Polarity	Transformer	Max Common Mode Voltage
1	S	Reference Input	0-20A	High	KCTS Reference	240VAC
2	E	Reference Output	0-20A	Low	Transformer	240VAC
3	EB	TUT Input*	0-20A	High	Customer	240VAC

3.1 Introduction

This chapter is a reference for the functions and locations of the Instrument's front panel features and provides brief descriptions of each feature for quick access. **Please read this information before operating the Instrument.** Front panel operating instructions for the Instrument are provided in this chapter and Remote Operating instructions are in Chapter 4.

3.2 Front Panel Features

Front panel features (including all controls, displays, indicators, and terminals) are shown in Figure 3.2.1. Each front panel feature is briefly described in Table 3.2.1.

3.3.4 ERROR MESSAGES

Wrong Ratio and Polarity: Shut down system. Both wrong polarity and ratio are selected for TUT. Check and try again. If error persists, TUT may be damaged internally. High Distortion/Harmonics: Shut down system and make sure all connections are solid. If it persists, TUT may be damaged internally and should be checked by other methods. Error Channel is too High: Turn Variac down. Error cannot exceed 5Amps or instrument may be damaged. Verify Ratio is correct. **Open Secondary:** Shut down system. Check TUT connections.

4.0 MAINTENANCE

4.1 Introduction	
4.2 Replacing the Fuse	
4.3 Cleaning the Air Filters	
4.4 Cleaning the Instrument External Surface	
4.5 Recalibration	

4.1 Introduction

This chapter explains how to perform the routine user maintenance required to keep your Instrument in optimal operating condition.

The topics covered in this chapter include:

- Replacing the Fuse
- Cleaning the Air Filter
- Cleaning the Instrument External Surface

Figure 5.2. KATC-C2 Fuse and Air Filter location

4.2 Replacing the Fuse

The fuse is accessible from the Instrument's rear panel. See Figure 5.2.

To avoid electrical shock or personal injury, ensure that the Instrument is switched off and disconnected by removing the line power cord from the power input socket before attempting to access the power fuse.

To access & replace the fuses, proceed as follows:

1. Disconnect line power.

2. Using a standard 5mm wide screwdriver, insert it to the slit and pull upwards for both ends until the cap and fuse are disengaged.

3. Pull the fuse holder and replace the defective fuses. Use the recommended fuse ratings and manufacturer in Table 5.2.

4. Return the fuse holder by pushing down the cap until it completely closes.

Description	Voltage	Amperage	Manufacturer	Part Number
(1x) AC DC Fuse Cartridge, Glass, Time Lag, 5mm x 20mm	250V	5.0A	Bel Fuse Inc.	5ST 5-R

 Table 5.2. Recommended Fuse Replacement

4.3 Cleaning the Air Filters

The air filter is accessible from the Instrument's rear panel. See Figure 5.2.

Damage caused by overheating may occur if the area around the fan is restricted, the intake air is too warm, or the air filter is clogged. The air filter must be removed and cleaned at least every 30 days or more frequently if the Instrument is operated in a dusty environment.

To access and clean the air filters, proceed as follows:

1. Disconnect line power.

2. Remove the filter retainer by holding its two upper corners or two lower corners and pulling it outward until it disengages from the fan guard.

- 3. Remove the air filter that is in between the Filter Retainer and Fan Guard. See Figure 5.3.
- 4. Clean the filter by washing it in soapy water. Rinse and dry it thoroughly before reinstalling.
- 5. Place the filter at the back of the retainer.

6. Reinstall the retainer in the fan guard. The retainer is snapped on the four sides for the fan guard.

Figure 5.3: KATC-C2 Fan Filter Assembly

4.4 Cleaning the Instrument External Surface

Clean the exterior of the instrument using a soft cloth slightly dampened with either water or a non-abrasive mild cleaning solution that is not harmful to plastics.

Do not use hydrocarbons or chlorinated solvents for cleaning. They can damage the plastic materials used in the Instrument.

4.5 Recalibration

For the Instrument's recalibration, directly contact TESCO through phone or email. See section **1.2 Contacting TESCO** for contact details. TESCO recommends recalibration on an annual basis. Further details can be found on the Calibration Certificate provided with your instrument.
