Horn Bypass Jumpers

TESCO Horn Bypass Jumpers are used on self-contained meter services, to temporarily supply a customer's power while the meter is removed from service. The Jumpers have a high-tension design, which firmly grip the horn bypass on a meter socket. TESCO Horn Bypass Jumpers are constructed of 4-AWG heavy-duty copper wire, and rated at 600V/100A. The two copper connectors at each end of the wire are fully insulated for added safety.

All TESCO jumpers are built with the tradition of reliability and ruggedness.

Specifications
