THE EASTERN SPECIALTY COMPANY

# SW Release Notes

## TDM SW Revisions:

Base Software: 2.0.5r

New Software: 2.0.6r

## TDM SW Compatibility:

1. This application is compatible only with NextGen devices with a firmware version of 3.1.5r
2. This application is compatible only with CAT. 6330 devices with a firmware version of 1.4.5r
3. This application is compatible only with CAT. T4000 devices with a firmware version of 1.4.6r
4. Database version 4.1.8r

## TDM SW Features Update:

1. Add multiplier field for meters. This does not impact results' pass/fail status and measurements.
2. Add Tags feature for Sites/stations. This is to give users more flexibility in filtering records to upload to their device during Device DB Full sync.
3. Add support for Silent Install / unattended installation. For IT departments to rollout/install the application to multiple computers without interrupting the user's work.

## TDM SW Bug Fix

1. Fix tab order for Meter station meter fields.
2. Fix Custom Meter defaults save/clear operation.
3. Fix default class for self-contained meters in CSV Meter import.
4. Prevent exporting PDF reports when there are no results selected.
5. Fix number field increments/decrements, they will now be based on their significant digits. For example, a field which shows 0.500 will have its increments by 0.001.

## SW Release Notes

---

### NextGen Software Revisions:

Base Software: 3.1.4r

New Software: 3.1.5r

### NextGen Software Compatibility:

- VRMs must be: VRM-MB, 5.3.0 or VRM-MB, 5.3.1 or VRM-MB, 5.3.2 or the VRM-MA / VRM-BL software
- FPGA must be version 1.3.2 or 1.3.4

### NextGen Software Features Update:

1. Added multiplier field for meters. This does not impact results' pass/fail status and measurements.

### NextGen Software Bug Fix:

1. Fix number field increments/decrements, they will now be based on their significant digits. For example, a field which shows 0.500 will have its increments by 0.001.
2. Fix issue where user cannot change the service in main menu to a delta.
3. Fix issue where 16S 4-Wire Delta service defaults are half of what they are supposed to be.

# SW Release Notes

## SiteTester Software Revisions:

Base Software: 1.4.4r

New Software: 1.4.5r

## SiteTester Software Compatibility:

- MB-FPGA must be version "1.0.0S", "1.0.0r", "1.0.1r", "1.1.0r", "1.2.0r", "1.2.1r" or "1.2.2r"
- CT-FPGA must be version "1.0.0S", "1.0.0r", "1.0.1r" or "1.1.0r"

## SiteTester Software Features Update:

1. Add feature that enables users to use Probe A as secondary and Probes B + C as primary for 3S Sites only.
2. Add multiplier field for meters. This does not impact results' pass/fail status and measurements.
3. Add feature which will allow users to adjust their probe when doing CT test (only when using 1 Lite wire probe).

## SiteTester Software Bug Fix:

4. Fix an issue where RFL & RLL load types are not working when running Meter Tests.
5. Fix Channel display bug in Waveform Screen when in HOLD mode.
6. Fix number field increments/decrements, they will now be based on their significant digits. For example, a field which shows 0.500 will have its increments by 0.001.
7. Show who calibrated/reset the calibration due date in Calibration page.

# SW Release Notes

---

## EvseTester Software Revisions:

Base Software: 1.4.5r

New Software: 1.4.6r

## EvseTester Software Compatibility:

- GFCI-MA: 1.1.10r
- PL4000-MA: 1.1.4r
- MB-FPGA must be "1.2.0r" or "1.2.1r"
- MITM-MA: 1.0.1r

## EvseTester Software Features Update:

1. Add PL4150 support for DC.
2. Show that EvseTester is using ISO/DIN protocol in the UI.

## EvseTester Software Bug Fix:

1. Increase MITM threshold current when starting a test.
2. Show correct models (T4000 vs T4350) on the user interface labels.
3. Fix number field increments/decrements, they will now be based on their significant digits. For example, a field which shows 0.500 will have its increments by 0.001.
