# T4000 Upgrade

**NextGen EVSE Charger Testing Power**

**Q: Can my EVSE equipment be upgraded?**

**A:** Yes, TESCO can upgrade your existing T4000 to the new T4350. Our suggestion is when your EVSE unit is shipped to TESCO for its yearly calibration, that is the perfect time for the upgrade. Once your upgrade is complete, your unit will also be compatible with our new PL4150 Load Box designed for testing of DC Super Chargers

**Q: How do I proceed with the upgrade path?**

**A:** Depending in which model you have, there are three different upgrade paths.

If you have the **T4000-101 (CCS1 only)**, the upgrade will be to the **T4350-101, 350A CCS1 only**.

If you have the **T4000-103 (CCS1 and TESLA/NACS)**, the upgrade will be to the **T4350-103, 350A CCS1 and TESLA/NACS**.

If you have the **T4000-101 (CCS1 only)**, you can also upgrade to the **T4350-101, 350A CCS1 and TESLA/NACS**.

The estimated time for the upgrade will be approximately two weeks.
